# OUR PRODUCT PORTFOLIO KNOWS NO LIMITS, ONLY POSSIBILITIES.

**AS VERSATILE AS YOUR REQUIREMENTS - OUR PRODUCT PORTFOLIO** 

## Do you have any questions about our extensive product portfolio or are you looking for a solution for a special application?

No problem – all our product groups can be easily combined with each other and together with our technical support we will develop the optimal solution specifically for your application.

### INDUSTRY SOLUTIONS

# ANYONE DEVELOPING FOR THE INDUSTRY MUST LEARN FROM THE INDUSTRY.

Every industrial sector has its own language and its own requirements, so there is no one-size-fits-all solution. It is therefore important to us to work with our customers to develop solutions for their individual needs, regardless of which industry they come from.

As a result, FSG has been able to develop trust and expertise in all key industries over the decades. Thanks to unconventional approaches, we have often been able to set standards that many industrial sectors cannot be imagined without to this day. Today our components are trademarks for quality and innovation in many branches of industry.

# THE RIGHT SOLUTION FOR EVERY INDUSTRY.

# DRAW-WIRE SENSORS

For length measurements in agricultural machines or vehicles, FSG cable-pull sensors are of great importance. With their robust construction, single-layer cable winding, and stable spring retraction, they meet all the requirements for reliable and long-lasting data acquisition.

With measuring ranges from 0–100 mm up to 30 m, their usage enables precise measurement and ensures higher work efficiency and improved safety in all agricultural operations.

- Robust construction for extreme environments
- High accuracy using threaded spindle

## **DRAW-WIRE SENSORS PREMIUM-Series**

Available with the following signal outputs:

4-20 mA / 0-10 V CAN / CANopen / CANopen-safety J1939

### Other special features:

- · High operational reliability and measuring accuracy
- Extensive accessories
- V4A version available
- Winding takes place in a single layer

SL001250-GS55

Measuring length: up to 1,25 m

**BASIC-Series** 

- Robust, highly flexible steel cables
- Drum with threaded spindle
- for measuring lengths up to 60 m

SL3000-GS130 PREMIUM-Series Measuring length: up to 30 m

SL3000-GS190 **PREMIUM-Series** Measuring length: up to 60 m

**DRAW-WIRE SENSORS Special-Version / Heavy Duty** 

SL0-GS125 Special-Version Measuring length: up to 10 m

SL04-GS160 Special version with rope brake

SL004-GS-170 Special-Version Measuring length: up to 12 m

### SL5-20-GS190 HEAVY DUTY Measuring length: up to 20 m

Measuring length: up to 4 m

SL3000-GS80

**PREMIUM-Series** 

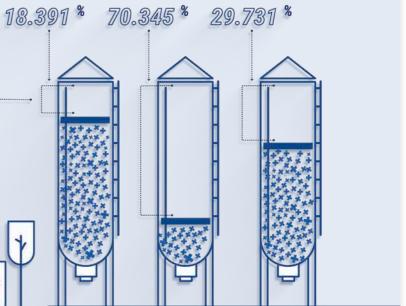

SL003000-GS80 **BASIC-Series** Measuring length: up to 3 m

SL005000-GS130 **BASIC-Series** Measuring length: up to 5 m

## **DRAW-WIRE SENSOR Robust and flexible**

## SLOOR-GS80

Measuring length: **up to 3 m** 

### Special features:

- thicker measuring rope (0.81mm instead of 0.55mm for BASIC-Series) • 50% higher retraction force (compared to BASIC-Series) Robust metal housing
- · Variable construction concept Rope exit possible from both sides of the housing (realization of right or left version)
- · Flexible mounting of standard encoders possible
- · variable mounting by additional pulleys horizontal / vertical

QUALITY & RELIABILITY 🗊

# WE LEAVE NOTHING TO CHANCE.

When it comes to quality, there are no compromises for FSG - regardless of when and where our devices are in use worldwide. Maximum reliability and seamless readiness for action are our top priority. We will develop and manufacture all of our products for a long sensor life for every condition. All series devices go through an extensive 100% test in in-house laboratories and test stands. In this way we always have full control over the quality process. Our new developments pass a detailed type approval test and are certified by external institutes.

With us you are always on the safe side through:

# **OUR DAY-TO-DAY BUSINESS:** MAKING A DIFFERENCE. **OUR FIVEFOLD PROMISE OF PERFORMANCE**

90% depth of production, 100% passion નિક્ત

Due to 90% vertical integration, we can customize our products 100% to your needs.

Every day, over 470 employees ensure that you are satisfied and that "Made in Germany" continues to stand for quality.

### Our standard: customization

**@** –

FSG products are not only excellent, they are always perfectly designed and customized for your requirements.

### 75 years of innovation is tradition

# 5

We will develop measurement sensors that are reliable and perfectly matched to their intended use. Our solutions often become industry innovations and have been for 75 years.

### Always where our customers are

– n°n –

FSG is represented internationally and we guarantee you the best support, no matter when and where you need us.

### **Our competence – for your satisfaction.**

Together we will find the sensor solution that is specially tailored to your needs.

I look forward to your ideas and visions.

S. KÖNIG SALES MANAGER

# MANUFACTURING & PRODUCTION

Nowadays, there is a constant demand by customers for more complex solutions of automation problems which have to go into serial production at short notice. With CAD workstations in the development department and drafting offices and with CNC machines in use in steel construction, production, and in assembly, we have established the necessary conditions for rapid product realization ready to go into serial production. Each step of production is watched and controlled by our own quality management according to the guidelines of DIN EN ISO 9001:2015.

# **SCIENTIFIC &** RESEARCH

Having its focus of development at the heart of Berlin, FSG has two additional locations in Königs Wusterhausen near Berlin. Specific customer requirements and requests are realized at all sites. Forward-looking tendencies and developments were analysed and regarding their feasibility be examined and tested.

# **TEST LAB &** QUALITY MANAGEMENT

Our development, test and EMC departments are equipped with state of the art computer-aided technical equipment and facilities. Related and required functional tests can be carried out practise-orientated and tests to ensure compliance with EMC goals be simulated. Automated test stations are used to control and record the guaranteed functional characteristics of every single device before delivery.

In the process we never lose sight of customer requirements as well as statutory standards and safety guidelines. The results of each final inspection are saved and archived electronically.

### **DISTRIBUTION NETWORK**

# DISTRIBUTION MEANS TRUST. THAT'S WHY WE ONLY TRUST THE BEST.

Through the international orientation of our company and the consistent expansion of new sales structures and opportunities, we offer our global customers a presence close to the market of specialists for measurement and sensor technology from FSG Fernsteuergeräte.

### OUR LOCATIONS

# **EVERYTHING A QUESTION** OF THE LOCATION

Our employees are the DNA of our success. Spread over 4 locations, they are responsible for FSG developing individual and professional solutions and products for its customers. To ensure that this path to success is not interrupted, we promote our employees and invest heavily in our machinery. This is the only way to guarantee that we will still be where we are today - always at the top.
